| František | Wichterlová  |
| Johannes  | Van der Berg |
| François  | Tremblay     |
| Mark      | Taylor       |
| Ellie     | Sullivan     |
| Victor    | Stevens      |
| Puja      | Srivastava   |
| Jack      | Smith        |
+-----------+--------------+
(Output limit exceeded, 10 of 67 total rows shown)
```

After running the query described above, determine what is the last name of the 6th record? Enter it below. Remember to order things in descending order to be sure to get the correct answer.

> Taylor

✓ **Correct**

7. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the   **1 / 1 point**
ER diagram in order to familiarize yourself with the table and column names in order to write accurate queries and get the appropriate answers.

See if there are any customers who have a different city listed in their billing city versus their customer city.

```
1    SELECT
2        c.CustomerId
3        ,c.City
4        ,i.BillingCity
5    FROM Customers c
6        LEFT JOIN Invoices i ON i.CustomerId = c.CustomerId
7
8        WHERE City != BillingCity
```

Run

Reset

```
+------------+------+-------------+
| CustomerId | City | BillingCity |
+------------+------+-------------+
+------------+------+-------------+
(Zero rows)
```

Indicate your answer below.

● No customers have a different city listed in their billing city versus customer city.

○ 3 customers have a different city listed in their billing city versus customer city.

○ 8 customers have a different city listed in their billing city versus customer city.

○ 17 customers have a different city listed in their billing city versus customer city.
