# Module 2 Coding Assignment

Latest Submission Grade 100%

1. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the   **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the
appropriate answers.

Run Query: Find all the tracks that have a length of 5,000,000 milliseconds or more.

```
1    SELECT TrackId
2         ,Milliseconds
3    FROM Tracks
4    WHERE Milliseconds >= 5000000
```

[Run]
Reset

```
+---------+--------------+
| TrackId | Milliseconds |
+---------+--------------+
|    2820 |      5286953 |
|    3224 |      5088838 |
+---------+--------------+
```

How many tracks are returned?

```
2
```

✓ **Correct**

2. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the   **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the
appropriate answers.

Run Query: Find all the invoices whose total is between $5 and $15 dollars.

```
1    SELECT InvoiceId
2         ,Total
3    FROM Invoices
4    WHERE Total BETWEEN 5 AND 15
```

[Run]
Reset

```
+-----------+-------+
| InvoiceId | Total |
+-----------+-------+
|         3 |  5.94 |
|         4 |  8.91 |
|         5 | 13.86 |
|        10 |  5.94 |
|        11 |  8.91 |
|        12 | 13.86 |
|        17 |  5.94 |
|        18 |  8.91 |
|        19 | 13.86 |
|        24 |  5.94 |
+-----------+-------+
(Output limit exceeded, 10 of 168 total rows shown)
```

While the query in this example is limited to 10 records, running the query correctly will indicate how many total records there are - enter that number below.
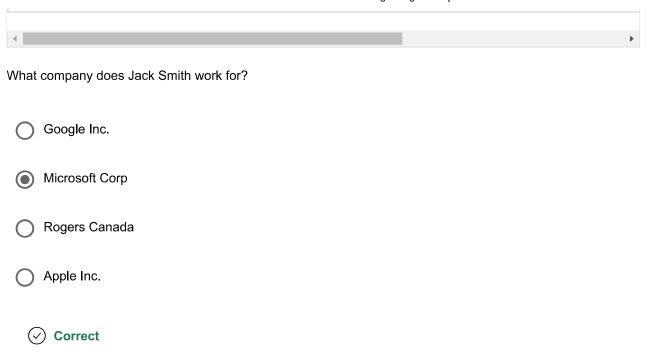

> 168

✓ **Correct**

3. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the appropriate answers.

Run Query: Find all the customers from the following States: RJ, DF, AB, BC, CA, WA, NY.

```
1    SELECT FirstName
2          ,LastName
3          ,Company
4          ,State
5    FROM Customers
6    WHERE State IN('RJ','DF','AB','BC','CA','WA','NY');
```

Run

Reset

```
+-----------+----------+----------------------+-------+
| FirstName | LastName | Company              | State |
+-----------+----------+----------------------+-------+
| Roberto   | Almeida  | Riotur               | RJ    |
| Fernanda  | Ramos    | None                 | DF    |
| Mark      | Philips  | Telus                | AB    |
| Jennifer  | Peterson | Rogers Canada        | BC    |
| Frank     | Harris   | Google Inc.          | CA    |
| Jack      | Smith    | Microsoft Corporation| WA    |
| Michelle  | Brooks   | None                 | NY    |
| Tim       | Goyer    | Apple Inc.           | CA    |
| Dan       | Miller   | None                 | CA    |
+-----------+----------+----------------------+-------+
```

What company does Jack Smith work for?

○   Google Inc.

◉   Microsoft Corp

○   Rogers Canada

○   Apple Inc.

⊘ **Correct**

4. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the   **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the
appropriate answers.

Run Query: Find all the invoices for customer 56 and 58 where the total was between $1.00 and $5.00.

```
1    SELECT InvoiceId
2         ,InvoiceDate
3         ,CustomerId
4         ,Total
5    FROM Invoices
6    WHERE Total BETWEEN 1 AND 5 AND CustomerId IN (56,58) ;
```

[Run]

Reset

```
+-----------+---------------------+------------+-------+
| InvoiceId | InvoiceDate         | CustomerId | Total |
+-----------+---------------------+------------+-------+
|       119 | 2010-06-12 00:00:00 |         56 | 1.98  |
|       142 | 2010-09-14 00:00:00 |         56 | 3.96  |
|       337 | 2013-01-28 00:00:00 |         56 | 1.98  |
|       120 | 2010-06-12 00:00:00 |         58 | 1.98  |
|       315 | 2012-10-27 00:00:00 |         58 | 1.98  |
|       338 | 2013-01-29 00:00:00 |         58 | 3.96  |
|       412 | 2013-12-22 00:00:00 |         58 | 1.99  |
+-----------+---------------------+------------+-------+
```

What was the invoice date for invoice ID 315?
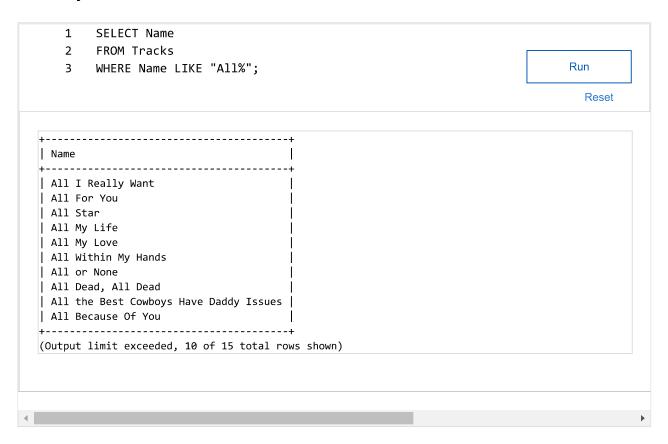

○   1-29-2013

○ 6-12-2010

◉ 10-27-2012

○ 12-22-2013

⊘ **Correct**

---

5. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the   **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the
appropriate answers.

Run Query: Find all the tracks whose name starts with 'All'.

```
1    SELECT Name
2    FROM Tracks
3    WHERE Name LIKE "All%";
```

Run

Reset

```
+---------------------------------------+
| Name                                  |
+---------------------------------------+
| All I Really Want                     |
| All For You                           |
| All Star                              |
| All My Life                           |
| All My Love                           |
| All Within My Hands                   |
| All or None                           |
| All Dead, All Dead                    |
| All the Best Cowboys Have Daddy Issues |
| All Because Of You                    |
+---------------------------------------+
(Output limit exceeded, 10 of 15 total rows shown)
```

While only 10 records are shown, the query will indicate how many total records there are for this query - enter
that number below.

15

⊘ **Correct**

6.   **1 / 1 point**

All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the ER diagram to familiarize yourself with the table and column names to write accurate queries and get the appropriate answers.

Run Query: Find all the customer emails that start with "J" and are from gmail.com.

```
1    SELECT Email
2    FROM Customers
3    WHERE Email LIKE "J%gmail.com";
```

Run

Reset

```
+--------------------+
| Email              |
+--------------------+
| jubarnett@gmail.com |
+--------------------+
```

Enter the one email address returned (you will likely need to scroll to the right) below.

jubarnett@gmail.com

✓ **Correct**

7. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the   **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the appropriate answers.

Run Query: Find all the invoices from the billing city Brasília, Edmonton, and Vancouver and sort in descending order by invoice ID.

```
1    SELECT InvoiceId
2         ,BillingCity
3         ,Total
4    FROM Invoices
5    WHERE BillingCity IN ('Brasilia','Edmonton','Vancouver')
6    ORDER BY InvoiceId DESC
7
```

Run

Reset

```
+-----------+-------------+-------+
| InvoiceId | BillingCity | Total |
+-----------+-------------+-------+
|       362 | Edmonton    | 13.86 |
|       351 | Edmonton    |  1.98 |
|       328 | Vancouver   |  0.99 |
|       276 | Vancouver   |  5.94 |
|       254 | Vancouver   |  3.96 |
|       231 | Vancouver   |  1.98 |
|       230 | Edmonton    |  0.99 |
|       178 | Edmonton    |  5.94 |
|       156 | Edmonton    |  3.96 |
|       133 | Edmonton    |  1.98 |
+-----------+-------------+-------+
(Output limit exceeded, 10 of 14 total rows shown)
```

What is the total invoice amount of the first record returned? Enter the number below without a $ sign.
*Remember to sort in descending order to get the correct answer.*

13.86

✓ **Correct**

8. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the
appropriate answers.

Run Query: Show the number of orders placed by each customer (hint: this is found in the invoices table) and
sort the result by the number of orders in <u>descending</u> order.

```
1   SELECT
2       CustomerId
3       ,COUNT(*) AS Number_of_Orders
4   FROM
5       Invoices
6
7   GROUP BY CustomerId
8   ORDER BY Number_of_Orders DESC
9
```

Run

Reset

```
+------------+-------------------+
| CustomerId | Number_of_Orders  |
+------------+-------------------+
|          1 |                7  |
|          2 |                7  |
|          3 |                7  |
|          4 |                7  |
|          5 |                7  |
|          6 |                7  |
|          7 |                7  |
|          8 |                7  |
|          9 |                7  |
|         10 |                7  |
+------------+-------------------+
(Output limit exceeded, 10 of 59 total rows shown)
```

What is the number of items placed for the 8th person on this list? Enter that number below.

7

✓ **Correct**

9. All of the questions in this quiz refer to the open source Chinook Database. Please familiarize yourself with the **1 / 1 point**
ER diagram to familiarize yourself with the table and column names to write accurate queries and get the
appropriate answers.

Run Query: Find the albums with 12 or more tracks.

```
1    SELECT
2        AlbumId
3        ,COUNT(*) as Number_of_Tracks
4    FROM Tracks
5    GROUP BY AlbumId
6    HAVING Number_of_Tracks >= 12
```

Run

Reset

```
+---------+------------------+
| AlbumId | Number_of_Tracks |
+---------+------------------+
|       5 |               15 |
|       6 |               13 |
|       7 |               12 |
|       8 |               14 |
|      10 |               14 |
|      11 |               12 |
|      12 |               12 |
|      14 |               13 |
|      18 |               17 |
